

So few view points are available on media I receive that the it looks like propaganda! I am refering to the dropping of the cross-ownership ban.

I will not allow or view/read more than one source controled by the same owner! Allowing owners to increase the media control in the same market will make matters worse and is bad for the United States Economy as if I only allow one owner access to my home I will consume less media and that will increase unemployment in the media industry.
